Dear Hiring Manager,

I'm eager to apply for the Engineering Intern position at Samsung R&D Institute. I'm a Lovely Professional University, India engineering student. I am concentrating in B.Tec (IT) for my degree, and I have finished taking all of the prerequisite courses listed in your job description. My major is Software Testing & Engineering. I was inspired to apply for this job by your company's involvement in a number of significant infrastructure projects close to my home and the opportunity for this position to contribute to that work.

Developing New Application, Software & Website always inspire me a lot. And I know using java is going to be possible and achieve my goal to be a successful software engineer. I hope to become a beneficial software engineer intern for your company through the constant improvement of my skills and knowledge. I possess good coding skills and excellent task management. I like cutting-edge system architecture using Java, Swing, HTML5, CSS3, JavaScript, and Laravel frameworks. I played a key role in organizing numerous internal systems, including tools for order input and management, conversion and revenue reporting, and tracking of the production workflow. I also created unique REST APIs that were implemented in Laravel, core PHP & basic Java Spring Boot. Excellent communication, high concentration levels, and good task management are not my only advantages as a trained software engineer intern. You'll certainly value my collaboration, motivation, and teamwork.

I have refined my strengths of interest in Software Engineering, where I like to give solutions in database technology, programming, app development. The following is a snapshot of my technical skills:

- ✓ Agile Project Management
- ✓ Custom Web Applications
- ✓ Java Swing.
- ✓ Data Structure & Algorithm
- ✓ Different Tools Like Adobe Xd, Figma.

It would be a pleasure to learn more about new technology, and I would welcome the chance to provide further insight into my knowledge of project management, technical abilities, personal attributes, and track record of success in building revenue generating web & app technologies compatible across multiple platforms, browsers, and devices.

Thank you for considering my candidacy for this position. I hope to hear from you soon to schedule an interview.

Sincerely,
Shykat Roy
